

Hello,

The Intake Disposition Reports are manually created and non-public information redacted before distribution. These reports are not automatic and are created to facilitate the distribution of the final status of animals impounded at our shelter. All animals needing placement are posted on Adopt-a-Pet or our Department Webpage. If the animal is not posted, it has been adopted, euthanized, rescued, or returned-to-owner, which means the animal no longer needs networking. The Intake Disposition report only tells the current (final) disposition and should not impact animals still needing networking and/or placement into permanent loving homes. Our priority continues to be the animals still at the shelter needing adoptive families. Thank you for networking shelter animals and facilitating their placement.

Regards,

AVAS Staff
