### SUMMARY:

The Landscaping and Lighting Act of 1972 permits the installation, maintenance and servicing of landscaping and lighting through annual special assessments on real property benefiting from the improvement. Currently, the Apple Valley Lighting and Landscaping District includes 20 locations.

For levying annual assessments, it is necessary that the Town Council adopt the initial resolution describing improvements and ordering the engineer to file a report. (Note: the Engineer's Report has all ready been filed and is made a part of this agenda item for the

Council's review and approval). Second, the Town Council should approve the report as filed, or the Council may modify and then approve the report, and; third, adopt a resolution of intention to levy assessments and set a date for a public hearing.

The resolution of intention declares to the affected property owners that the Town intends to levy and collect assessments within the district for next fiscal year. The resolution also gives notice of the time and place for the public hearing of the proposed assessment.

The annual assessments for each annexed territory of the Assessment District are indicated in Part B of the Engineer's Report. Though a tract of homes, Tract 17278, has been activated for assessments, there is no increase in the assessments for this fiscal year for the remaining locations. The recommended procedures comply with all requirements of Proposition 218.

**FISCAL IMPACT:**

The attached report summarizes the revenues and expenditures of the Assessment District, the estimate of cost and the proposed cost per lot per tract. The costs are borne by the property owners within each identified tract. There is no direct budgetary impact to the Town.
