About Us

The AVAS Department is able to provide enhanced animal related services and community support thanks to proceeds from annual fundraising events and strong public/private partnerships.

Apple Valley Animal Services (AVAS) is responsible for the enforcement of all California Animal related laws and Title 15 of the Town's Municipal Code. Our philosophy is to promote responsible pet ownership, compassion toward animals and safe human-animal interactions. In order to meet the community's expectations and to raise the bar for municipal animal care, the Department offers various valuable services through community outreach, public education, legislation, sheltering, and enforcement programs.

Our purpose is to provide responsive, efficient, and high quality animal care services that preserve and protect public health and safety and ensures the humane treatment and care of all animals.

Major Program Descriptions

Proceeds from AVAS Fundraisers provide medical care for sheltered animals, lower adoption fees, and low cost/free vaccines

Field Services Division

Coordinates State mandated rabies enforcement and licensing compliance, which includes the control of animals running at large, bite reports, cruelty investigations, enforcement of animal keeping laws, noise complaints, assisting injured animals, animal establishment inspections and school-site visits.

Sheltering Services Division - Municipal Shelter

Coordinates sheltering activities, including housing surrendered, abandoned, and impounded animals with the parameters of the law, permanent placement services, including coordination with rescue organizations and wildlife preserves, conducting low-cost vaccination clinics, manages the Department's sheltering contracts, and oversees volunteer training that enhances the level of services provided to housed animals. and school-site visits.

Field Services Division

Coordinates public/private partnerships to provide long-term placement of sheltered animals and fundraising for programs supporting the Department's goals to reduce euthanasia and increase live release rates. Support Services is tasked with organizing events, training, and activities for both Field and Sheltering Services.

MEDICAL CARE

Under the direction of our Supervising Veterinarian, animals coming into our shelter are examined, given routine vaccinations to reduce the spread of disease and provided with necessary medical care. Thanks to annual donations, AVAS is able to provide enhanced veterinary services for animals needing specialized care in order to become adoptable without jeopardizing funding allocated to the daily medical care of the entire shelter population.

LOWER ADOPTION FEES

Rising costs for spay/neuter services have an impact on the funds needed to legally adopt a sheltered animal out to a new owner. Your donations allow AVAS to cover additional expenses without raising adoption fees. Keeping adoption fees affordable helps with our life-saving efforts.

LOW COST/FREE SERVICES

Donor funding allowed AVAS to provide free microchips and vaccines at various events throughout the year.

November is...
ADOPT-A-SENIOR PET MONTH
