Concerned Apple Valley Resident

I (LaToya Brooks), An Apple Valley Residents Against Potential Eminent Danger from the implementation of 5G Towers being installed in our local public parks and public schools am requesting my voice be heard.

I believe 5G directly affects my family, and community. And do not want the towers installed in my local parks and schools where my children can be exposed to strong EMFs (Electro Magnetic Fields).

5G uses both microwaves and millimeter waves which emit harmful radiation over time.

I'm all for moving our town forward with faster internet speeds both for upload and download of data, but there has to be a safer way for our children.

Thank You,

Sincerely,

Concerned Residents for A Safe Community
LaToya Brooks
