

To Council Members, Town of Apple Valley
From: Resident Al Rice

Re: Page 20-12 Administrative Budget of Successor Agency

Since submission on January 28, 2019, to the S.B. County Oversight Board, your Administrative Budget has contained obvious Job Title errors and at last year the Board asked if there were Job Title errors. The Director of Finance responded "Yes". Why did this originate and continue now for the third year when numerous persons have knowledge of this problem without apparent effort of correction of the document? Is this a staff problem or the contractor product?

The Budget contains work to be performed by an Administrative Analyst. Has not this job has been eliminated from the Finance Department?

The CA State Department of Finance for now the 4th year has responded to the Town's Admin. Budget that it appears to be excessive.

Is Town Staff and the Consultant still attempting to locate the missing documents valued at \$ 15 million that former Mayor Stanton spoke before the Department of Finance Hearings on Public Television pleading to overturn their denial reimbursement based on importance of missing documents. (I assume that this transaction did not utilize an Escrow Officer in the Real Property transaction.)
