# Brightline West – Connecting Riders, Workers & Our Local Communities

**\$8 billion project linking Las Vegas & Southern California has immediate labor, economic, tourism & environmental benefits\***

## Creates Many Jobs

- 40,000 construction jobs<sup>(1)</sup>
- 1,000 permanent jobs
- Support from local and national unions

## Boosts the Economy

- \$10 billion economic impact<sup>(2)</sup>
- \$1 billion tax revenues<sup>(3)</sup>
- Spurs development in areas surrounding stations

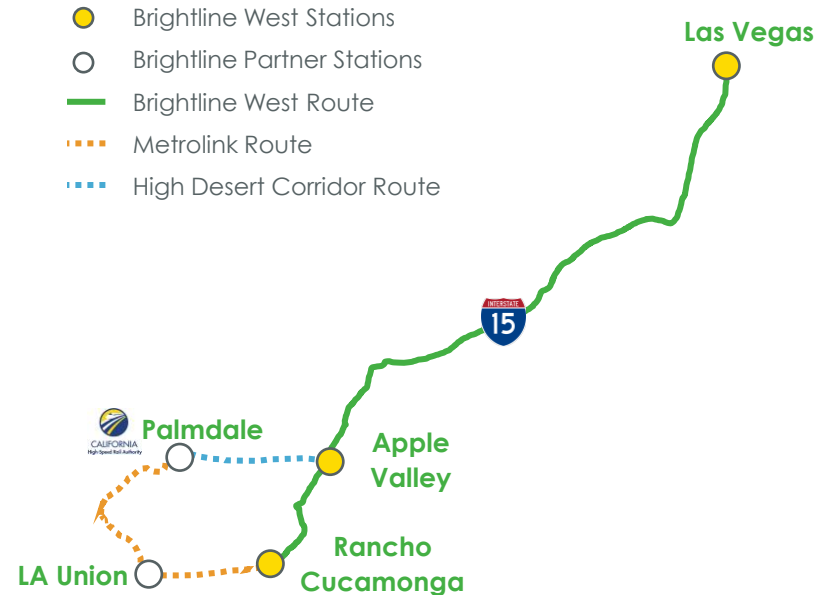

## Promotes Accessibility

- Supports 10 million one-way trips per year
- 3-hour train ride, which is twice as fast as driving
- Conveniently located stations accessible from all Southern California communities

## Improves the Planet

- All-electric emission free high-speed trains
- Removes 3 million cars per year from I-15
- Lower emissions by 400K tons of CO<sub>2</sub> annually

## BL West & Metrolink Connection Rail Corridor Map

\* Project numbers represent totals for Brightline West constructed system.

1. Equivalent jobs based on project job hours.
2. Impact inclusive of total construction spend and 10 years of operation.
3. Revenues achieved at the federal, state, and local levels during time frame of construction and 10 years of operation.

# BL West Project has Broad Reaching Local Infrastructure & Transit Benefits

## New Highway Infrastructure

System expected to invest ~\$1B in **highway infrastructure improvements** in California

- **Installation of safety barrier:** Protects the highway median along the entire BL West corridor in I-15
- **9 bridge replacements:** Updates older, existing bridges to meet current safety standards
- **Adds 13 emergency crossovers** to facilitate access across median for first responders and maintenance crews

## Alleviates Congested Corridor

Diverting from automobile trips to train travel **removes 3 million cars from the road annually**

- Reduces vehicles miles travelled by approximately **500 million miles per year**
- Fewer drivers & less congestion **reduces highway accidents** and improves overall safety of roadway network

## Broadband Partnership with State

Exploring partnership with State through the “Middle-Mile Broadband Initiative” to help **provide broadband access to underserved areas**

- Brightline West’s technology needs for high-speed rail service **makes it possible to run and connect fiber cabling** alongside the 218-mile system

## Local Transit Connectivity

Brightline’s Rancho Cucamonga station **will be a multi-modal transit hub:**

- **Metrolink:** Connects at station to San Bernardino line, which has 14 total stops from San Bernardino to LA Union
- **Omnitrans Bus Service:** Destinations available throughout San Bernardino Valley via 25+ routes
- **Future Airport Tunnel:** Accessibility to Ontario International Airport via underground tunnel to be built at station
