

# Town of Apple Valley Site Plan Review for Specific Plans

The Town of Apple Valley encourages prospective applicants to attend a pre-application conference with the Planning Division prior to formal submittal of a permit application. The conference should take place prior to any substantial investment.

After submitting your plans to the Planning Division for a Site Plan Review, your plans will be distributed to all Town Divisions involved in the permit process. All items listed on the checklist below must be included in your submittal package so that each Town Division can efficiently evaluate your project. **Project submittals which do not include these items will not be accepted for processing.** All plans must be collated, stapled and folded to 8 1/2" x 11" notebook size. Upon submittal, filling fees will be collected as listed below. Make checks payable to the Town of Apple Valley. Please feel free to contact the Planning Division at (760) 240-7000 Ext.7200 if you have any questions.

**Infiltration BMP Feasibility:**

Feasibility Criterion – Complete evaluation for each DA on the Project Site	
<p><sup>1</sup> Would infiltration BMP pose significant risk for groundwater related concerns? <i>Refer to Section 5.3.2.1 of the TGD for WQMP</i></p>	Yes <input type="checkbox"/> No <input type="checkbox"/>
If Yes, Provide basis: (attach)	
<p><sup>2</sup> Would installation of infiltration BMP significantly increase the risk of geotechnical hazards? (Yes, if the answer to any of the following questions is yes, as established by a geotechnical expert):</p> <ul style="list-style-type: none"> <li>• The location is less than 50 feet away from slopes steeper than 15 percent</li> <li>• The location is less than ten feet from building foundations or an alternative setback.</li> <li>• A study certified by a geotechnical professional or an available watershed study determines that stormwater infiltration would result in significantly increased risks of geotechnical hazards.</li> </ul>	Yes <input type="checkbox"/> No <input type="checkbox"/>
If Yes, Provide basis: (attach)	
<p><sup>3</sup> Would infiltration of runoff on a Project site violate downstream water rights?</p>	Yes <input type="checkbox"/> No <input type="checkbox"/>
If Yes, Provide basis: (attach)	
<p><sup>4</sup> Is proposed infiltration facility located on hydrologic soil group (HSG) D soils or does the site geotechnical investigation indicate presence of soil characteristics, which support categorization as D soils?</p>	Yes <input type="checkbox"/> No <input type="checkbox"/>
If Yes, Provide basis: (attach)	
<p><sup>5</sup> Is the design infiltration rate, after accounting for safety factor of 2.0, below proposed facility less than 0.3 in/hr (accounting for soil amendments)?</p>	Yes <input type="checkbox"/> No <input type="checkbox"/>
If Yes, Provide basis: (attach)	
<p><sup>6</sup> Would on-site infiltration or reduction of runoff over pre-developed conditions be partially or fully inconsistent with watershed management strategies as defined in the WAP, or impair beneficial uses? <i>See Section 3.5 of the TGD for WQMP and WAP</i></p>	Yes <input type="checkbox"/> No <input type="checkbox"/>
If Yes, Provide basis: (attach)	
<p><sup>7</sup> Any answer from Item 1 through Item 3 is “Yes”: <i>If yes, infiltration of any volume is not feasible onsite. Proceed to Form 4.3-4, Selection and Evaluation of Biotreatment BMP. If no, then proceed to Item 8 below.</i></p>	Yes <input type="checkbox"/> No <input type="checkbox"/>
<p><sup>8</sup> Any answer from Item 4 through Item 6 is “Yes”: <i>If yes, infiltration is permissible but is not required to be considered. Proceed to Form 4.3-2, Site Design BMP. If no, then proceed to Item 9, below.</i></p>	Yes <input type="checkbox"/> No <input type="checkbox"/>
<p><sup>9</sup> All answers to Item 1 through Item 6 are “No”: <i>Infiltration of the full DCV is potentially feasible, LID infiltration BMP must be designed to infiltrate the full DCV to the MEP. Proceed to Form 4.3-2, Site Design BMPs.</i></p>
