It is our professional opinion that **"No Further Investigation is Required"**.

2.0 INTRODUCTION

QUARRY ROAD 200, LLC (the “Client”), has engaged Jeffrey Tartaglino to conduct a Phase 1 Environmental Site Assessment (ESA) of the property located at Quarry Rd. & Flint Rd., Town of Apple Valley, CA., subsequently referred to in this report as “the subject property”. This assessment was prepared in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process (ASTM Designation: E1527-13).

2.1 Purpose

The assessment was designed to provide an objective, independent, professional opinion of the potential environmental risks, if any, associated with the subject property. The purpose of this environmental assessment was to identify recognized environmental conditions at the subject property. “Recognized Environmental Conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and the generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The identification of recognized environmental conditions in connection with the subject property may impose an environmental liability on owners or operators of the site, reduce the value of the site, or restrict the use or marketability of the site, and therefore, further investigation may be warranted to evaluate the scope and extent of potential environmental liabilities.

2.2 Scope of Services

This assessment was performed in accordance with the scope of services outlined in the American Society of Testing and Materials (ASTM) E 1527-13, Standard Practice for Environmental Site Assessments. There are no exceptions or deletions from the ASTM Practice E 1527-13. The services performed by Jeffrey Tartaglino for this Phase 1 Environmental Site Assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by firm’s similar doing Phase 1 Environmental Site Assessments. The scope of this assessment includes the following:

Records Review - Review of records (environmental database, local and state records, historical records, etc.)

Site Reconnaissance – A physical inspection of the subject property.

Interviews – Interviews conducted with present and past owners (if feasible), operators and occupants of the subject property; and with local and/or state government officials.

Report Preparation – The evaluation of information and the preparation of the report including the findings and conclusions, if any, for additional investigation(s).

Soils Samples – Were not part of the scope of work for this Phase 1.

Typically, a Phase 1 ESA does not include sampling or testing of air, soil, groundwater, surface water,

or building materials. These activities would be carried out in a Phase II ESA, if required.

2.3 Significant Assumptions

There is a possibility though even with the proper application of these methodologies that there may be conditions that exist on the subject property that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Jeffrey Tartaglino believes that the information obtained from the record review and interviews concerning the subject property are reliable. However, Jeffrey Tartaglino cannot and does not warrant or guarantee that the information provided by these sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but rather to provide the Client with information relating to the subject property.

2.4 Limitations and Exceptions

This report has been prepared for the exclusive use of the Client, and should not be reproduced or disseminated without the written approval of Jeffrey Tartaglino and the Client. Jeffrey Tartaglino has retained a copy of this report. No additions or deletions are permitted without the express written consent of Jeffrey Tartaglino. Use of this report in whole or in part by parties without permission from Jeffrey Tartaglino and the Client is prohibited.

Information obtained from public records review, the site inspection, and interviews were used to characterize the subject property. Although the services provided are extensive, findings and conclusions are limited to and by the information obtained. If information becomes available concerning the subject property that was not included in this report, it should be made available to Jeffrey Tartaglino so that the conclusions can be re-examined and modified, if applicable. Further non-intrusive and intrusive investigations and assessment methods are available that could further characterize the subject property's soils and groundwater conditions.

Jeffrey Tartaglino interviews are limited by the quality and completeness of answers provided by the proposed questions during the interview(s). The extent of historical research performed by Jeffrey Tartaglino is limited to availability, cost, and timeliness of utilizing various resources such as aerial photographs, historical Sanborne Maps, Land Evidence Records (deeds pertaining to historical site ownership), and local directories, all of which may indicate the historical utilization of the subject property. It should be noted that while the chain-of-ownership research and information provided should be accurate, it should in no way be construed as an actual Title search and should not be utilized or relied upon for any legal purposes.

Events occurring on the subject property after the date of the inspection are beyond the scope of this report. Jeffrey Tartaglino makes no expressed or implied representations or warranties regarding any changes in condition of the premises after this date.

In addition, except in the event of gross negligence or willful misconduct by Jeffrey Tartaglino which directly and materially contributes to a defect or deficiency in a plan, permit, entitlement, drawing, specification or other instrument or item of work product of Jeffrey Tartaglino or work product of any sub-consultant engaged by Jeffrey Tartaglino with consent and approval of Client. The Client shall look solely to the party undertaking the defective work and not to Jeffrey Tartaglino. This report is not intended to have any direct bearing on the value of the property.

Jeffrey Tartaglino shall not be liable for any special, consequential or exemplary damages resulting in whole or in part from customer use of the data. Liability on the part of Jeffrey Tartaglino is limited to the monetary value paid for this report. This report does not constitute a legal opinion.

2.5 Special Terms and Conditions

Authorization to perform this assessment was given by QUARRY ROAD 200, LLC. Instructions as to the location of the subject property, access, and an explanation of the subject property and facilities to be assessed were provided by QUARRY ROAD 200, LLC.

The following is a list of terminology that is used throughout this report and therefore should be defined:

Actual Knowledge: The knowledge actually possessed by an individual who is a real person, rather than an entity.

Adjoining Properties: Any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

All Appropriate Inquiry: That inquiry constituting “all appropriate inquiry into previous ownership and uses of the subject property consistent with good commercial or customary practice” , as defined in CERCLA, 42 U.S.C. 9607 (b)(3), 9607 (q); and 9607 (r), assuming compliance with other elements of the defense.

Activity and Use Limitation (AUL): Legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Business Environmental Risk: A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the E 1527-13 practice. Considerations of business environmental risk may involve addressing on or more non-scope considerations.

Controlled Recognized Environmental Condition: A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.

Data Failure: A failure to achieve the historical research objectives of ASTM 1527-13 even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data Gap: A lack of or inability to obtain information required by ASTM 1527-13 despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by the ASTM 1527-13, including but not limited to, site

reconnaissance (for example, an inability to conduct the subject property visit) and interviews (for example, an inability to interview the key subject property manager, regulatory officials, etc.)

Environmental Professional: A person meeting the education, training and experience requirements, as set forth in the ASTM E 1527-13 practice (example, someone who has been a Registered Environmental Assessor with the State of California).

Hazardous Substance: A substance defined as a hazard substance pursuant to CERCLA 42 USC 9601(14), as interpreted by USEPA regulations and the courts.

Historical Recognized Environmental Condition: A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AUL's, institutional controls, or engineering controls). Before calling the past release and HREC, the EP must determine whether the past release is a REC at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I is conducted, the condition shall be included in the conclusions section of the report as a REC.

Migrate / Migration: Refers to movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

Obvious: That which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer while visually or physically observing the subject property.

Occupants: Those tenants, subtenants, or other persons or entities using the subject property or a portion of the subject property.

Owner: Generally the fee owner of record of the subject property.

Practically Reviewable: Information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the subject property without the need for extraordinary analysis of irrelevant data.

Reasonable Ascertainable: Information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

Recognized Environmental Conditions: The presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

Subject Property: The real property that is subject to this Phase 1 Environmental Site Assessment.

User: The party seeking to use Practice E 1527-13 to perform an environmental assessment of the subject property.

Equipment that may potentially contain PCB's includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCB's was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). PCBs in electric equipment are controlled by United States EPA regulation 40 CFR, Part 761. According to this regulation there are three categories for classifying electrical equipment; less than 50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated", and greater than 500 ppm is considered "PCB"

That survey should include an assessment of all subject building materials, including those areas which are normally inaccessible. Any materials found to be ACBM should be handled in accordance with applicable regulations.

8.0 FINDINGS AND OPINIONS

Jeffrey Tartaglino has performed this Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the property located at Quarry Rd. & Flint Rd., Town of Apple Valley California. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. The assessment has identified no evidence of recognized environmental conditions (REC'S) in connection with the Subject Property.

It is our professional opinion that **“No Further Investigation is Required”**.

Under the All Appropriate Inquiry Rule, future and continuing obligations are required to maintain landowner liability protections under CERCLA. Specifically, (1) complying with land use restrictions and institutional controls; (2) taking reasonable steps with respect to hazardous substance releases; (3) providing full cooperation, assistance and access to persons that are authorized to conduct response actions or natural resource restoration; (4) complying with information requests and administration subpoenas; and (5) providing legally required notices.

In the event that undocumented areas of contamination are encountered during future excavation and or construction activities, work should be discontinued until appropriate health and safety procedures are implemented. A contingency plan should be prepared to address contactor procedures for such an event to minimize the potential for costly construction delays. In addition, County Department of Environmental Health or Regional Water Quality Control Board, depending on the nature of the contamination, should be notified regarding the contamination. Any contamination remediation and removal activities should be conducted in accordance with the pertinent local, state, and federal regulatory guidelines, under the oversight of the appropriate agency.

9.0 DATA GAPS

There were no data gaps that significantly affected our ability to identify recognized environmental conditions associated with the property.

10.0 DEVIATIONS

No deviations from the recommended scope of ASTM Standard E 1527-13 were performed as part of this Phase 1 ESA.

11.0 ADDITIONAL SERVICES

There were no additional services rendered with this report.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. **DO NOT** use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened.** **DO NOT** send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do **NOT** reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.
