TOWN OF APPLE VALLEY, CALIFORNIA

AGENDA MATTER

Subject Item:

REVIEW AND APPROVE CONSTRUCTION SPECIFICATIONS FOR THE FEDERAL STIMULUS ROAD RECONSTRUCTION PROJECT, AND AUTHORIZE STAFF TO PROCEED WITH ADVERTISEMENT FOR THIS PROJECT.

Summary Statement:

The Federal Stimulus Road Reconstruction Project includes the repaving of several miles of roads within the Town of Apple Valley. The Engineering Division has prepared a list of road segments for immediate rehabilitation should money from the federal stimulus bill materialize in Apple Valley. The segments that have been chosen for this particular project are not only based on their rankings in the Town's Pavement Management System, but also on the speed at which the roads can be made ready for construction. Per the requirements of the federal stimulus bill, in order for a project to be considered shovel-ready, it must be ready to begin within ninety (90) days. If funding from the federal stimulus bill does not occur, the selected roads will be returned to the Town's Pavement Management System to be repaired in their regularly scheduled order. The road segments included on this list will involve rehabilitation only, since stimulus funding requirements do not allow the funds to be utilized for any capacity-enhancing improvements.

Staff has reviewed the plans for this project and is satisfied that the specifications meet the intent of the Town Council for this project. The specifications, with bid packet, are being brought to the Town Council for review, approval and authorization to proceed prior to the bid opening. Staff recommends that the Town Council review the specifications and bid packet that are available in the Town Council office; approve the specifications and direct staff to proceed with the project.

Recommended Action:

Review and approve specifications for the Federal Stimulus Road Reconstruction Project and direct staff to proceed with the project.
