

**TOWN OF
APPLE VALLEY, CALIFORNIA**

AGENDA MATTER

Subject Item:

AUTHORIZE PURCHASE OF SEWER VIDEO INSPECTION TRUCK

SUMMARY STATEMENT

On May 2, 2006, the State Water Resources Control Board adopted General Waste Discharge Requirements (WDRs) for all publicly-owned sanitary sewer collection systems with more than one mile of sewer pipe. The goal of the WDRs is to provide a consistent statewide approach for reducing Sanitary Sewer Overflows (SSOs), including the development of a written Sewer System Management Plan (SSMP). One of the essential strategies identified in the SSMP for successful SSO prevention is the routine utilization of a Closed Circuit Video Inspection program. In conjunction with a proactive sewer cleaning and maintenance program, this equipment provides the ability to inspect large areas of the sewer system that are otherwise inaccessible to workers, short of excavation. In order to comply with State regulations and facilitate effective and efficient maintenance of the Town's sewer system, the purchase of Video Inspection equipment is warranted.

Earlier this year, staff researched and identified the ideal specifications for a video inspection truck that would best serve the Town's Wastewater Department needs. Staff attended a demonstration of the operational system of a Cues CCTV Sewer Inspection Truck purchased by Cucamonga Valley Water District last year and found the Cues vehicle to be the most optimal choice for the Town. Staff is very familiar with Cues as the Town has previously rented Cues inspection equipment on several occasions and found it to be extremely reliable and user-friendly. Additionally, unlike other manufacturers located out-of-state, the Cues corporation is located in Ontario, California; the close proximity of the factory to the Town provides easy access to routine service and repairs when the need arises. Lastly, Staff obtained three positive references for the Cues Sewer Inspection Truck from the cities of Ontario, Huntington Beach, and Carlsbad.

Plumbers Depot, the local authorized distributor for Cues, has agreed to honor the winning bid amount of \$175,632.50 awarded by Cucamonga Valley Water District in August 2008 (Exhibit A). Accounting for deletions (optional equipment), the adjusted purchase price of the vehicle is \$139,231.54 (Exhibit B). \$170,000 is budgeted in the Wastewater capital outlay account for this purchase.

Recommended Action:

Authorize the purchase of a Cues CCTV Sewer Inspection Truck from Plumber's Depot in the amount of \$139,231.54.
